

Ravshanov Kamoliddin

Backend Developer | Python | FastAPI | Django | REST API | CI/CD

kravshanov97@gmail.com · +998 88 927-27-03 · Tashkent, Uzbekistan

ABOUT ME

Backend developer with 2 years of hands-on experience building reliable and scalable server-side applications using Python. Skilled in REST API design, relational databases, and backend frameworks. Experienced in setting up and maintaining CI/CD pipelines with GitHub Actions and Docker. I value clean code, collaborative teamwork, and continuous professional growth.

EXPERIENCE

Backend Developer

Sector Soft

Project 1: Fitrat

- Development and maintenance of the project backend
- Bug investigation, root-cause analysis, and patch delivery
- Ongoing feature development and server-side support

Project 2: Millenium Taxi Integration

- Built an integration module consuming the Millenium Taxi external API
- Developed backend logic for real-time tracking of taxi locations based on live API data
- Implemented dynamic driver position updates to be displayed on a map interface

Backend Developer

Personal Startup — Freelancing Platform (Agile, team of 8)

- Owned end-to-end development of the Job, Offer, Proposal, and Contract modules — the core transaction layer
- Designed and implemented secure payment workflow integrations (card, PayPal)
- Built filtering, rating/review, and category systems consumed by frontend clients
- Configured GitHub Actions CI/CD pipeline: automated pytest runs on every pull request, Docker image build and push to registry on merge to main

Backend Developer

Cradle Vision — Retail Platform

- Developed REST APIs for Visitors, Sellers, and Branches — covering the full user-role surface of the platform
- Built and versioned all endpoints with FastAPI, ensuring async-ready, performant request handling
- Implemented branch-level data isolation and seller permission flows
- Set up Docker-based deployment workflow; wrote CI pipeline with lint (ruff) and unit test stages

Backend Developer

ATS (Automatically Technology Solutions)

- Feature development and maintenance of the server-side application
- Regular health monitoring and performance profiling of the product
- Bug fixes and code quality improvements

TECHNICAL SKILLS

Language	Python
Frameworks	FastAPI · Django · Django REST Framework
Database	PostgreSQL
DevOps & CI/CD	Docker · Git · GitHub · GitHub Actions · CI/CD pipelines

Async / Queue

Celery · Redis

Testing

Unit Testing · pytest

API

REST API design & versioning

EDUCATION & COURSES

IT Park Tashkent — Python Backend — Certificate, 2022

Jahongir Rahmanov — Build Your Own Python Web Framework, 2024

Jahongir Rahmanov — Build Your Own ORM, 2024

LANGUAGES

Uzbek — Native · English — B2 (Upper-Intermediate)
