ABOUT

I am Tojimatov Eliyorbek, a strong junior level backend developer. I have 1 year of experience as a backend developer. From April to October 2024, I worked as a backend developer at InSoft. From November to today, I have been working as a freelancer. During my time at InSoft, I participated in the <https://dental.brim.uz> project. As a freelancer, I created the front and backend of the <https://idealkurs.uz> website and created the backend of the <https://meningbozorchim.uz> mobile application for the market.

WORK EXPERIENCE

04/2024 – 10/2024

Intern, iSoft

Fergana, Uzbekistan

- I contributed to the development of software solutions, enhancing overall project efficiency.
- Assisted in identifying and resolving technical issues in collaboration with senior developers.

09/2024

Freelancer

Fergana, Uzbekistan

- <https://idealkurs.uz>
- <https://meningbozorchim.uz>

03/2025

You Nine Academy

Fergana, Uzbekistan

- I have been conducting effective lessons on basic computer literacy and introduction to programming for children.
- I provide both theoretical and practical knowledge in web development technologies such as HTML, CSS, JavaScript, PHP, Laravel, and MySQL.
- I monitor the progress of each student and ensure an individualized approach to their learning.

PROJECTS

◆ idealkurs.uz

As part of this project, I developed the backend for features such as displaying the list of courses, user registration, and authentication. Using the Laravel framework, I implemented stable database integration, ensured secure storage of user data, and created RESTful API endpoints.

◆ **meningbozorchim.uz** (Bozorchim-Mobile Application for Local Markets (Backend Development))

In this project, I fully developed the backend of the mobile application. The main focus was on optimizing database performance by utilizing techniques such as multiple queries, efficient joins, and indexing.

- Built a secure and scalable backend using Laravel framework.
- Integrated real-time features such as location-based market listings and user-specific promotions.
- Designed and implemented RESTful APIs to support mobile client operations.
- Developed a modular system architecture to enable smooth future updates and scalability.
- Added gamification elements like the "Lucky Customer" module to increase user engagement.
- Optimized database performance through advanced query structuring, indexing, and efficient joins.
